

Simón Stein

Software Engineer

Experience

2022 - Present

Itesa | Innovation Hub

I have worked on software development projects, using tools such as Next.js, Node.js, MongoDB, and SQL. I started my career as a Fullstack Developer and have risen to the position of Technical Leader, which I currently hold. I have collaborated on projects for well-known brands such as Quilmes and Budweiser. Additionally, I have been responsible for the development of Wipper and Prometheo.

2021 - 2022

Woowup

I developed solutions in the company's integrations area using PHP. I was part of a team of developers responsible for integrating customer data into the product.

2021 - 2022

University of Buenos Aires

I was a teaching assistant in the subjects of Algorithms and Programming 2 and Algorithms and Programming 3.

I collaborated with teams dedicated to teaching topics such as data structures, object-oriented programming, and test-driven development, among others.

2018 - 2020

Lamroth Hakol

I served as a community leader and informal educator, responsible for groups of young people aged 2 to 17. I was responsible for planning and supervising weekly activities with a focus on imparting values.
